

# All the Sweetness You Want With No Guilt

## Flora Sweet™ **NEW!**

Goodness for your digestive health, tasty for your mouth

**Prebiotic Fibers are important and helpful in improving the immune system and beneficial microflora in the body.**

- ✓ Diabetic Friendly - will not cause blood sugar spikes
- ✓ Good Source of Gentle, Non-Irritating Fiber
- ✓ Healthy alternative to sugar and artificial sweeteners
- ✓ Improves quantity of beneficial microflora
- ✓ Balances cholesterol metabolism
- ✓ Produces secondary beneficial enzymes
- ✓ Increases calcium and other mineral absorption
- ✓ Can be used in baking

Serving size:

1 gram (approx. 1/4 tsp) 100 Servings per container  
Use 1/2 - 1 tsp (approx. 3 gr.) in tea, coffee, or water

Ingredients:

Prebiotic fibers and Sprouted Mung Bean Extract, free of herbicides, pesticides and not genetically modified

The new Novus Research product *Flora Sweet*™ is a synergistic blend of oligofructose (soluble fiber), fructose and a proprietary enriched sprouted mung bean extract. It contains sweet prebiotic fiber and nutrients which selectively feed and nourish the friendly bacteria of the intestinal tract, and thereby contribute to a healthy microflora balance, in effect balancing the intestinal flora, improving intestinal transit time and supporting regularity. *Flora Sweet*™ also helps produce beneficial enzymes, helps protect the intestine through the barrier effect of the Bifidobacteria and lowers the pH of the intestine. *Flora Sweet*™ also assists in the prevention of free radicals, helps provide B vitamins, helps in the improved absorption of Calcium, and helps balance lipid and cholesterol metabolism.

Consumption of 1 gram per day over a 14-day period helps support regularity in terms of improved transit time and stool size. The recommended general daily fiber intake for adults is 25 grams or more from all sources. Bifidogenic effects may be obtained on a maintenance basis through the daily ingestion of 1-3 grams of Flora-Sweet, which will produce a five-fold increase in beneficial bacteria.

Products similar to *Flora Sweet*™ have been sold in Europe for over 10 years, and are used in the French health care system as a dietary supplement. The Diabetic Syndicate of France (AFD) has strongly endorsed the use of this type of product for over 6 years. Keep product in airtight container and away from heat and moisture. *Flora Sweet*™ will absorb moisture from the air very quickly or get hard from excess heat. Shelf life sealed: 2 years.
