

LIQUID-GEL DIGESTION ENZYMES

Delicately Balanced for Clinical Effectiveness

When the body is lacking the right digestive enzymes, the food we eat does not digest properly, which causes discomfort, gas, and bloating. Liquid-Gel Digestion Enzymes use a synergistic blend of plant-based enzymes to improve digestion by aiding in the process of breaking down proteins, fats, dairy and carbohydrates. Enzymes help the body process even the most complicated foods such as nuts, seeds, and beans. Enhanced with a proprietary blend of herbs including Ginger, Anise, Cardamom, Cloves, Fennel, Licorice and Piper Longum, Liquid-Gel Digestion Enzymes helps soothe the stomach and fuel the digestive system.
